ABSTRACT

This publication consists of the main and mini reports for Missouri's Show-Me Standards and vocational education competencies for industrial education. This database documents the common ground between academic skills and vocational competencies. Both components of the Show-Me Standards--knowledge (content) and performance (process)--have been cross-referenced to the vocational competency lists included in this database. Both reports begin with terms and definitions, competency lists available, and table of contents to activities available in all areas. The main report then provides the cross reference to the show-me standards for the following: air conditioning, heating, and refrigeration; automotive technology; auto collision technology; building maintenance; cabinetmaking; carpentry; commercial art; cosmetology; culinary arts; diesel mechanic; drafting; electrical trades; electronics; graphic communication/printing; industrial maintenance; machine tool technology; plumbing; small engines; and welding. The duty band and task statement are correlated to knowledge and performance as well as academic skills: math, communication arts, science, social studies, health/physical education, and fine arts. All are identified by letters and/or numbers. Eighteen sample industrial education activities have these components: grade level, teaching time frame, rationale, unit description, learner outcomes correlated to frameworks (academic skills), activity name, description, materials or resources required, specific directions for organizing and conducting activity, assessment, and required materials. The mini report's cross-reference to show-me standards uses words

+++++ ED421650 Has Multi-page SFR---Level=2 +++++

in its correlation of duty bands and task statements to knowledge (content) and performance (goals). Duty bands, task statements, knowledge, and performance are presented in statement format. (YLB)

# Missouri's Show-Me Standards and Vocational Education Competencies

## Cross Reference

Main Report
September 1997

**INDUSTRIAL EDUCATION**

## *Foreword*

This database documents the common ground that has existed for years between academic skills and vocational competencies. It is intended to be ***"a model,"*** not *"the model,"* of how vocational and academic educators can work together to strengthen foundation skills needed by students in K-12 grades.

Both components of the Show-Me Standards--knowledge (content) and performance (process)--have been cross-referenced to the vocational competency lists included in this database, as have many Curriculum Frameworks statements.

Because most vocational program are taught in the 9-12th grade levels, suggested academic knowledge and performance skills (Curriculum Frameworks) for **grades 9-12** have been used for this pilot project The only exception is the Exploratory Family and Consumer Sciences course, which is taught in middle and junior high grades, and is therefore, cross-referenced to grades 5-8 Curriculum Frameworks.

Sample activities have been developed for most competency lists, also. The writers of these activities used the crosswalk information to develop actual, "real world" classroom activities that teach/reinforce academic *and* vocational concepts.

This project is intended to provide a starting point for school districts working on integrating academic and vocational skills, so customization of the crosswalk is highly encouraged. Both printed and electronic versions of the information are available from the Instructional Materials Laboratory. (See previous page for address and ordering information.) Initial data entry has been done in Microsoft *Access 2.0.*

## *Credits*

This project, which was called "Vocational 21st Century Curriculum" during the development stage, has taken the dedication of many individuals to bring it this far. Without the following individual contributors, this work could not have been accomplished.

**Project coordination, Instructional Materials Laboratory, UMC, Columbia, Mo.**
*Administration/vision*
Phyllis Miller, Ph.D., and Harley Schlichting, Ph.D.
*Coordination*
Diane Davis
*Group facilitation*
Rich Branton, Diane Davis, Veronica Feilner, Julie Gibbs, Randy Mertens, Beth Meuschke, Phyllis Miller, Dana Tannehill, Becky Tieman
*Editing*
Rebecca "Becky" Tieman, Stacey Burns
*Data entry*
Marshall Simmons, Elizabeth "Liz" Savio, Katie Larson

**Database design**
Brian Glasgow, Electronic Consultations International, Columbia, Mo.

**Funding and leadership, Department of Elementary and Secondary Education, Jefferson City, Mo.**
Fred Linhardt, Vocational Planning and Evaluation Section
Delbert Lund, Vocational Planning and Evaluation Section
Russ McCampbell, Division of Vocational and Adult Education

**Content specialists/activity writers**

David Aderhold, (IE) Cabinetmaking
Mary Avery, (FACS) Core Employment Skills; Child Care Provider/Assistant
Francis Barnes, (IE) Auto Collision Technology
Ron Bays, (IE) Machine Tool Technology
Mary Beene, (FACS) Family and Consumer Sciences
Tom Benke, (IE) Commercial Art
Chuck Berendzen, (IE) Drafting
Harry Bertrand, (AG) Landscaping & Turf Management
Arlene Broeker, (BE) Mathematics in Business, International Business
Jane Brown, (ME) Marketing Education
Clara Burson, (FACS) Nutrition and Wellness
Shelley Campbell, Science
Dan Chappell, (AG) Horticulture; Greenhouse Operation & Management; Fish & Wildlife
Prentess Clifton, Sr., (IE) Diesel Mechanic
Ken Conaway, (IE) Graphic Communications/Printing
Linda Crumpacker, Math
Roger Day, (IE) Welding
Pat Dittman, (BE) Business & Personal Law
Robin Ferguson, (IE) Auto Mechanics

Jonathan Hoer, (AG) Ag Science II
Gay Holman, (BE) Business Management; Accounting I and II
Terri Jungers, (BE) Computer Business Applications
Pat LaDuke, (FACS) Family and Individual Health
Sally Lillard, (BE) Business Economics
Mila Lowry, (BE) Business Management; Keyboarding and Keyboarding Applications
Pat McKee, (IE) Electrical Trades
Bob McNary, (AG) Ag. Marketing, Ag. Construction
Jack Miller, (IE) Machine Tool Technology
Milton Moore, (IE) Drafting
Stanley Moore, (IE) Building Trades
Barbara Mountjoy, (IE-HO) Health Care Assistant
Neil Preston, (IE) Electronics
Calvin Pyle, (AG) Ag Management
Tyne Rabourn, (BE) Business and Personal Law
Donna Robart, (BE) Business Communications
Mary Kay Robinson, (FACS) Custom Sewing; Industrial Sewing; Fashion Merchandising
Paul Santaularia, (IE) Culinary Arts
Sam Schulte, (IE) Auto Collision Technology
Amy Schupp, (BE) Mathematics in Business
James Scott, (IE) Commercial Art
Pat See, (IE) Cosmetology
Linda Siess, (IE) Cosmetology
Garry Sloan, (IE) Building Maintenance
Brenda Smith, (FACS) Family/Consumer Resource Management
Mike Smith, (IE) Auto Collision Technology
Teresa Stark, (IE) Culinary Arts
Marie Toms, (BE) Business Technology
Carolyn Vargas, (BE) Introduction to Business
Peggy White, Communication Arts
Dean Whitlow, (IE) Industrial Maintenance
Gay Wieland, (FACS) Family and Consumer Sciences; Exploratory FACS
Del Winston, (IE) AC/Heating & Refrigeration
Rick Witt, (ME) Marketing Education

**Key to codes:**
AG = Agriculture Education, BE = Business Education, FACS = Family and Consumer Science Education, ME = Marketing Education, IE = Industrial Education, IE-HO = Health Occupations

## *Terms and Definitions*

Like any other project, this one has its own language. Here's an explanation of the basic terms:

**Framework:** A state document that articulates benchmark statements for all grade ranges in six disciplines: communication arts, fine arts (comprised of dance, music, theatre and visual arts), health education/physical education, mathematics, science and social studies. Some disciplines address content statements (*to know*), others process statements (*to do*) and some do both. By examining the three-column landscape layout of each discipline, you can tell if there is a direct correlation between a *to know* and a *to do* statement (e.g., communication arts). The benchmark lists *to know* statements in the far left column, *to do* statements in the middle and offers sample activities in the far right column.

**Outstanding Schools Act:** This is the law that announced Missouri's Show-Me Standards and set the process in motion for creating the framework. The Act promotes higher standards in students' knowledge and performance.

**Show-Me Standards:** The Standards define what all Missouri students should know and be able to do upon graduation. It is divided into four performance goals and six knowledge standards. Because these Standards (73 total) have the force of law, all school districts must incorporate them into their curriculum.

**Strand:** Strands are general statements, written in Roman numerals, that organize each discipline within the framework (e.g., Problem Solving, Communication, Reasoning, Connections, etc.)

## *Competency List* (August 5, 1997)

**Agricultural Education**

| | |
|---|---|
| 1. | Adv. Crop Production |
| # | Adv. Livestock Production |
| # | Agribusiness |
| 2. | Agricultural Construction |
| 3. | Agricultural Machinery |
| 4. | Agricultural Management and Economics |
| 5. | Agricultural Marketing |
| 6. | Agricultural Power I |
| 7. | Agricultural Power II |
| 8. | Agricultural Science I |
| 9. | Agricultural Science I Supplement |
| 10. | Agricultural Science II |
| 11. | Agricultural Structures I |
| 12. | Agricultural Structures II |
| 13. | Animal Science |
| 14. | Fish and Wildlife Mgmt. |
| 15. | Floristry |
| 16. | Forest Mgmt. |
| 17. | Food Science and Technology |
| 18. | Greenhouse Operation and Mgmt. |
| 19. | Horticulture |
| 20. | Landscaping and Turf Mgmt. |
| • | Leadership I and II |
| • | Leadership and Personal Development for Advanced Students |
| 21. | Processing and Marketing Forest Products |
| • | SAE (Supervised Agri. Experience) Program |

**Business Education**

| | |
|---|---|
| 22. | Accounting I |
| 23. | Accounting II |
| 24. | Business and Personal Law |
| 25. | Business Communications |
| 26. | Business Economics |
| 27. | Business Management |
| 28. | Business Technology |
| 29. | Computer Business Applications |
| ★ | Computer Programming |
| 30. | International Business |
| 31. | Introduction to Business |
| 32. | Keyboarding and Keyboard Applications |
| 33. | Mathematics in Business |

**Family and Consumer Sciences Education**

| | |
|---|---|
| 34. | Child Care Provider/Assistant |
| 35. | Child Development, Care and Guidance |
| 36. | Clothing and Textiles, Intermediate |
| 37. | Clothing and Textiles, Advanced |
| 38. | Contemporary Living |
| 39. | Core Employment Skills |
| 40. | Custom Sewing |
| 41. | Exploratory FACS |
| • | FACS Leadership, Change, Careers |
| 42. | Family and Consumer Sciences |
| 43. | Family/Consumer Resource Management |
| 44. | Family/Individual Health |
| 45. | Family Living and Parenthood |
| 46. | Fashion/Fabric Consultant |
| ★ | Food and Nutrition - Interm. and Adv. |
| 47. | Food Service Worker |
| ★ | Home Ec I and II |
| ★ | Home Management |
| 48. | Housing, Home Furnishings and Equipment |
| 49. | Industrial Sewing |
| 50. | Nutrition and Wellness |

**Industrial Education**

| | |
|---|---|
| 51. | AC, Heating and Refrigeration |
| 52. | Auto Technology |
| 53. | Auto Collision Technology |
| 54. | Building Maintenance |
| 55. | Cabinetmaking |
| 56. | Carpentry |
| 57. | Commercial Art |
| 58. | Cosmetology |
| 59. | Culinary Arts |
| 60. | Diesel Mechanic |
| 61. | Drafting |
| 62. | Electrical Trades |
| 63. | Electronics |
| 64. | Graphic Communications/Printing |
| 65. | Industrial Maintenance |
| • | Leadership (VICA) |
| 66. | Machine Tool Technology |
| 67. | Masonry |
| 68. | Plumbing |
| 69. | Small Engines |
| 70. | Welding |

**Health Occupations**

| | |
|---|---|
| # | Administrative Med. Asst. |
| 71. | Dental Aide |
| 72. | Health Care Assistant (core competencies) |
| 73. | Nurse Assistant/Aide |
| # | Pharmacy Aide |
| # | Physical Therapist Aide |
| # | Practical Nursing |

**Marketing Education**

| | |
|---|---|
| # | Cooperative Vocational Education |
| # | Entrepreneurship |
| # | Free Enterprise Economics |
| 74. | Marketing Education |
| # | Supervisory Management |

★ = Obsolete

# = By design, not included in crosswalk/database project

• = "Across-the-board" competencies

* = Core competencies (essential for the first day on the job). The numbers in brackets (e.g., A01) reflect the IDs used in computerized tracking software. Numbers in parentheses at the end of each competency apply to national skill standards by V-TECS. **NOTE: These competencies are addressed in the Missouri VICA Curriculum Guide lessons.

KEY: * = may use all "to do" statements # = same Frameworks as previous competency
98 = same Frameworks as previous competency 99 = "to know" statements may not be applicable

NOTES: * = Essential competencies (essential for the first day on the job). The numbers in brackets [e.g., A01] reflect the IDs used in computerized tracking software.
**NOTE: These competencies are addressed in the Missouri VICA Curriculum Guide lessons.

Notes: Duty bands and competencies do not need to be taught in any particular order. Competencies completed will depend on the length of the course. * Indicates duty bands composed of objectives from "Applied Foodservice Sanitation: A Certification Coursebook" by The Education Foundation of the National Restaurant Association. Permission to use these competencies on the profile granted. An asterisk (*) in the curriculum frameworks column(s) indicates all "to do" statements in that section are applicable. **NOTE: These competencies are addressed in the Missouri VICA Curriculum Guide lessons.

NOTES: * = Core competencies (essential for the first day on the job). The numbers in brackets (e.g., A01) reflect the IDs used in computerized tracking software. Skill standards were coordinated nationally by GATF; see accompanying performance indicator document for more information. Numbers in parentheses at the end of each competency apply to national skill standards by GATF.

NOTES: * = Core competencies (essential for the first day on the job). The numbers in brackets [e.g., A01] reflect the IDs used in computerized tracking software. Numbers in parentheses at the end of each competency apply to national skill standards by NTMA. **NOTE: These competencies are addressed in the Missouri VICA Curriculum Guide lessons.

NOTES: * = Core competencies (essential for the first day on the job). The numbers in brackets [e.g., A01] reflect the IDs used in computerized tracking software. Numbers in parentheses at the end of each competency apply to national skill standards by AWS (EG2.0-95). **NOTE: These competencies are addressed in the Missouri VICA Curriculum Guide lessons.

|---|---|
| **Title:** | **Refrigerant Principles and Practices** |
| **Competency Profile:** | Air Conditioning, Heating and Refrigeration (1997) |
| **Instructor(s) name:** | Del Winston |
| **Grade level:** | 11/12/Adult |
| **Teaching time frame:** | 2 days |
| **Rationale:** | Student will be able to reclaim, recycle and store various types of new/used refrigerants (CFCs, HCFCs and HFCs) and observe EPA Rule 608 for refrigerants (CFC, HCFC and HFC). |
| **Unit description:** | Understand the EPA Law 608 regarding refrigerants and operation of various types of recovery equipment. Observe safety rules pertaining to safe refrigerant handling. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 2.7 Recover refrigerants. | *Science*<br>**SC/VIII.A/9-12/3/a, b**<br>Increased demand for natural resources requires global cooperation and long-term planning to ensure the resource needs of successive generations will be met.<br>Compare the use of natural resources in developing countries to the use in industrialized nations.<br>Discuss how technology has provided a more efficient use of resources and extended their availability.<br>**SC/VIII.B/9-12/1/a**<br>Ecosystems are interconnected by biological, chemical, and physical processes so that changes in one ecosystem can have local or global consequences.<br>Observe and identify biological, chemical, or physical processes of one ecosystem that affect other ecosystems. | *Health Education/Physical Education*<br>**HP/III.D/9-12/1/a, b**<br>Preservation of a healthy environment includes individual responsibility, societal commitment, government regulations and health advocacy for the monitoring, reporting and prevention of potential environmental hazards.<br>Examine ways that individuals, communities, and state and federal government cooperate to promote environmental health.<br>Apply aesthetic consideration when addressing environmental health issues.<br>**HP/III.D/9-12/2/a**<br>Destruction of the ozone layer and global warming affect the health of individuals on a worldwide scale.<br>Assess environmental risks in their community and in the workplace.<br>Compare present environmental problems to the past and propose ways to reduce environmental health problems in the future. |

**Instructional activity name:** Refrigeration Principles and Practices (Reclamation)
**Description:** Student will recover refrigerant (CFC-12) from a refrigeration training unit. Student will use an OZ recovery system and a DOT-approved cylinder, observing safety rules pertaining to safe refrigerant handling.
**Materials/resources required:** OZ recovery system, refrigeration manifold gauge set, DOT-approved refrigerant recovery bottle, rag, training unit with R-12 refrigerant, safety glasses, refrigeration wrench

**Specific directions for organizing and conducting activity:**

1. Attach refrigeration gauge set to training unit's service valves.
***2. Reading manufacturer's instructions, connect recovery system to gauge set.
3. Using refrigeration wrench, "crack" the service valves.
**4. "Purge" refrigerant gauge set hoses, observing "de-minimus" purge rules.
**5. Start recovery unit and "pre-chill" recovery cylinder.
**6. Open valves on recovery system, gauges, and recovery bottle and recover liquid.
**7. After recovering liquid, switch to vapor.
**8. Recover system to EPA Specification 608.
9. Turn off recovery system.
10. Close all valves on refrigerant bottle, gauges, and recovery system.
11. Back seat service valves on training unit.
**12. Purge all hoses of residual refrigerant.
13. Remove all hoses.
14. Inspect area.
15. Return tools to tool room.

**Key**:
* HP/III.D/9-12/1/a, b
** HP/III.D/9-12/2a
*** CA/III/9-12/1/a, d, h, j

**Assessment procedures/criteria:**
Obtaining proper tools and equipment
Performance checklist with 100% correct
Written assessment with 80% accuracy

At later date, student will pass EPA certification test.

**Title:** **Refrigeration Principles and Practices**
**Competency Profile:** Air Conditioning, Heating and Refrigeration (1997)
**Instructor(s) name:** Del Winston
**Grade level:** 11/12/adult
**Teaching time frame:** 4-5 days, report assigned 7-10 days later

**Rationale:** Student will be able to discuss history of the HVAC/R industry, identify the basic components of a refrigeration system and be able to assemble a basic refrigeration system.

**Unit description:** Understand the theory, history, and cycle of refrigeration.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 2.1. Explain principles of refrigeration.<br>3.1. Identify different types of tubing and fittings.<br>3.2. Perform copper tubing operations, including cutting, flaring, soldering, brazing, bending, swaging, etc. | *Mathematics*<br>**MA/IV/9-12/2/c**<br>Mathematics is used in other subject areas.<br>Relate and describe the connections within topics of mathematics and other disciplines.<br>**MA/IV/9-12/3/d**<br>Mathematics is used in the real world.<br>Investigate and determine the importance of mathematics in their lives, future careers, and our ever-changing global society. | *Social Studies*<br>**SS/II.C/9-12/3/a, b, c**<br>How have new technologies in such areas as communication, transportation, industrial production, and agriculture contributed to social change and given rise to new issues?<br>Develop questions and ideas to initiate and refine historical research.<br>Conduct research to answer questions, make comparisons, and discover and evaluate patterns and cause-effect relationships.<br>Use technological tools and other resources to locate, select, and organize information of relevance for historical inquiry.<br>**SS/III.C/9-12/1/c, d**<br>What is the chronological sequence of events we are studying? How do the events relate to one another?<br>Use technological tools and other resources to locate, select, and organize information that is relevant to the research, seeking different perspectives on the same event.<br>Comprehend and interpret primary and secondary historical sources, identifying perspectives and comparing different accounts of the same event. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| | | **SS/III.C/9-12/1/n**<br>Identify tasks that require a coordinated effort and work with others to complete those tasks.<br>**SS/III.C/9-12/6/l**<br>How have individuals influenced events of their times?<br>Apply historical knowledge and chronological thinking skills to different contexts. (Chronological thinking skills include establishing the temporal order of events, the measurement and calculation of calendar time, and the interpretation of time lines.) |

**Instructional activity name:** Refrigeration Principles and Practices
**Description:** Assemble a basic mechanical (functioning) refrigeration system and work in a safe manner.
**Materials/resources required:** Tubing of various sizes, tubing cutter, reamer, oil can, flaring tool, flaring block, oxyacetylene torch, training unit, compressor, condenser, evaporator, metering device, rag, safety glasses, sand cloth, flux, "o" brazing rod, soap, and water

**Specific directions for organizing and conducting activity:**
*1. Select proper sized tubing needed to assemble training units. (MA/IV/9-12/2/c)
*2. Measure proper sized tubing to proper lengths to assemble training units.
**3. Using tubing tools, cut measured tubing.
**4. Prepare tubing for flaring/swaging and soldering.
**5. Assemble all flared and swaged joints.
**6. Tighten all flared fittings.
**7. Braze all necessary fittings using oxyacetylene torch, a 0% brazing rod and flux.
**8. Wash and clean brazed joints.
**9. Using proper procedures, shut down torch.
**10. Inspect all work.
11. Clean up work area and return tools to tool room.
**12. Complete a written report (due six school days from today).

Key:
* MA/IV/9-12/2/c and MA/IV/9-12/3/d
** SS/III.C/9-12/1/c, d, n and SC/II.C/9-12/3/c and SS/II.B/9-12/2/c, e

**Assessment procedures/criteria:**
Demonstrate obtaining correct sized tubing, fittings, torches, brazing material and equipment.
Assemble a leak-proof (100% sealed) system to be leak-tested to assess competency 2.5.
Student will also pass a written test with 80% accuracy. Student will write a two-page, double-spaced report on basic mechanical refrigeration.

| | |
|---|---|
| **Unit Title:** | **Frame-Body and Unibody Construction and Repair (Module 7)** |
| **Competency Profile:** | Auto Collision Technology (1995) |
| **Instructor(s) name:** | Harold Harden |
| **Grade level:** | 11-12 |
| **Teaching time frame:** | 3 hours in the classroom, 2-3 class periods in the shop as needed |
| **Rationale:** | The student will perform alignment of rear and front wheels according to published specifications. |
| **Unit description:** | Steering and suspension systems |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| W8. Perform four-wheel alignment. | *Mathematics*<br>**MA/II/9-12/1/b**<br>The language of mathematics may be used through reading, writing, listening, and speaking.<br>Interpret generalizations discovered through investigations to formulate, revise, and adjust mathematical definitions.<br>**MA/IV/9-12/1/c**<br>Problems may be looked at in more than one way.<br>Relate and describe the connections within topics of mathematics and other disciplines.<br>**MA/V/9-12/2/c**<br>Numbers and their relationships can be represented in multiple forms.<br>Analyze and describe relationships and the resulting effects between changes in an independent variable and a dependent variable. | *Science*<br>**SC/I.A/9-12/1/a**<br>Investigations may involve mathematical procedures to interpret observations, make predictions, describe sets of data, and determine the validity and significance of experimental results.<br>Analyze experimental data to determine patterns, relationships, perspectives, and credibility; use computer spreadsheets, graphing, and database programs to assist in quantitative analysis; and consider the possible effects of measurement errors on calculations. |
| | *Fine Arts*<br>**FA/IV.D/9-12/1/b**<br>Know how to employ two- and three-dimensional processes at a more sophisticated level.<br>Successfully demonstrate a variety of two-dimensional art techniques. | |

**Instructional activity name:** Perform four-wheel alignment
**Description:** Student will perform four-wheel alignment to published specifications.
**Materials/resources required:** IML *Auto Collision,* Module 7 Student Reference; I-Car textbook; I-Car study guide "Steering and Suspension;" I-Car video "Steering and Suspension," Unit 4; two 24" cardboard circles painted like a wheel and tire; protractor gauge; toe gauge; Hunter four-wheel alignment system; and complete strut

**Specific directions for organizing and conducting activity:**

1. Assign IML unit for student reading.
2. Lecture on IML lesson plan.
3. Lecture on I-Car curriculum and use cardboard wheels, protractor, toe gauges and strut to demonstrate alignment angles.
4. Show I-Car video.
5. Assign students to vehicles to perform actual alignments.

**Assessment procedures/criteria:**
Test and worksheet in IML's *Auto Collision,* Module 7, Unit 1; I-Car Test "Steering and Suspension"

|  |  |
|---|---|
| **Unit Title:** | **Suspension and Steering System** |
| **Competency Profile:** | Auto Mechanics (1994) |
| **Instructor(s) name:** | Robin Ferguson |
| **Grade level:** | 11-12 and adult |
| **Teaching time frame:** | 2 class periods (6 hours) |
| **Rationale:** | Upon completion of this lesson, the student should be able to diagnose steering and suspension alignment problems, determine correct alignment angles using service manual and electric information system, communicate with customers and write repair orders, and perform repairs and adjustments using clean, orderly, and safe work habits. |
| **Unit description:** | Suspension and steering systems |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| U2. Set correct alignment angles of front wheels.<br>U3. Set correct camber and toe on rear wheels. | *Mathematics*<br>**MA/I/9-12/4/d**<br>Mathematical problem-solving strategies can apply to all disciplines and real-world problems.<br>Apply the process of mathematical modeling to real-world problem situations.<br>**MA/II/9-12/2/d**<br>Mathematical ideas may be represented with visual models.<br>Plan and create effective verbal and non-verbal forms of communicating mathematics for a variety of purposes and audiences.<br>**MA/VI/9-12/2/d**<br>Properties and relationships of two- and three-dimensional shapes.<br>Deduce properties of, and relationships between, figures from given assumptions. | *Science*<br>**SC/I.A/9-12/4/a**<br>Technological tools and techniques extend human capabilities to perform investigations in more detail and with greater accuracy and precision.<br>Apply technological knowledge and skills to analyze and troubleshoot common mechanical and electrical systems, checking for possible causes of malfunction, and formulate and test logical and creative improvements that prevent future malfunctions.<br>**SC/IV.B/9-12/2/a**<br>The action of all forces can be explained by Newton's Laws of Motion that are used to predict changes in linear and/or rotational motion.<br>Evaluate information to describe how Newton's Laws of Motion are used to describe moving objects. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
|  | ***Health Education/Physical Education***<br>**HP/I.A/9-12/2/a**<br>The use of the scientific method and problem-solving helps individuals to examine system functions and disease formation.<br>Recognize actual problems related to healthy system functioning encountered in daily living situations, e.g., stress, inactivity, high-fat diet, etc. Using appropriate technology and other resources, formulate logical and creative strategies to predict, prevent and solve health problems. | ***Communication Arts***<br>**CA/I/9-12/2/c, d**<br>Locate and gather information and ideas.<br>Conduct searches using a variety of technologies and resources.<br>Select applicable primary and secondary resources from print and nonprint materials.<br>**CA/II/9-12/5/e**<br>Participate in formal and informal presentations and discussions.<br>Exchange information and ideas using technology. |

**Instructional activity name:** Classroom Shop Activities
**Description:** Set correct alignment angles of front and rear wheels
**Materials/resources required:** IML *Auto Mechanics* Module 5, Suspension and Steering System

**Specific directions for organizing and conducting activity:**

1. The student will use communications skills to determine customer's view of vehicle problem.
2. The student should use the proper equipment and tools to determine alignment problems. (requires the use of mathematics and scientific information/techniques)
3. The student may use art skills (by making drawings or models) to better communicate findings to the customer.
4. The student should locate the proper vehicle alignment specifications and repair procedures using service manuals.
5. The student will write a repair order (communication skills) and estimate the time and cost of repairs (math skills).
6. The student should perform the repairs/adjustment following Environmental Protection Agency and OSHA regulations (social studies) while practicing work habits that will avoid health or physical risks to self or others.

**Assessment procedures/criteria:**
The student should perform each of the activities and demonstrate a level of knowledge and skills equal to 80%.

**Unit Title:** **Orientation to Building Maintenance**
**Competency Profile:** Building Maintenance (1989)
**Instructor(s) name:** Garry Sloan
**Grade level:** 9-11
**Teaching time frame:** 4-5 days

**Rationale:** To identify building maintenance occupations and related fields, the following skills will be emphasized:
(CA) Research and present written and oral reports using correct grammar, punctuation, spelling, and capitalization.
(MA) Calculate salary and advancement opportunities.

**Unit description:** Introduction to Building Maintenance Occupations

| **Competencies (Tasks)** | **Frameworks (To Know and To Do)** |
|---|---|
| A1. Identify building maintenance occupations and related fields. | ***Communication Arts***<br>**CA/I/9-12/2/c, d**<br>Locate and gather information and ideas.<br>Conduct searches using a variety of technologies and resources.<br>Select applicable primary and secondary resources from print and nonprint materials.<br>**CA/I/9-12/3/f**<br>Process, organize and evaluate information and ideas.<br>Draw conclusions and form opinions based on data collected.<br>**CA/I/9-12/6/c**<br>Apply information, ideas, processes and skills learned in the study of communication arts to new situations and tasks.<br>Provide support for observations and opinions.<br>**CA/II/9-12/5/a-d**<br>Participate in informal presentations and discussions.<br>Speak expressively, adjusting tone and style of speech to audience and purpose.<br>Demonstrate effective listening by making relevant comments.<br>Respond appropriately to others' points of view.<br>Summarize or paraphrase the main points of the discussion. |

**Instructional activity name:** Identify Building Maintenance Occupations
**Description:** Define building maintenance; list related occupations, physical requirements, relationship to other industries, earning potential, and advancement opportunities.
**Materials/resources required:** Texts (instructor's choice), salary reports (various publications), job descriptions (*Dictionary of Occupational Titles* and other publications), local employees, handouts (developed by involved instructors)

**Specific directions for organizing and conducting activity:**

1. Coordinate with all involved instructors.
   - Point in course when taught
   - Instructor presentation time frame
   - Student completion time frame
   - Coordinate with job fair, if possible.
   - Host job fair, if possible. Students can coordinate their own job fair.
2. All instructors
   - Assign text and materials.
   - Distribute handouts.
   - Give lectures/allow discussion/assign due date.
   - Provide possible research options (publications, job fairs, local employers, etc.).
3. Share student product with all involved instructors.
   - Schedule assessment (each instructor to do as described in assessment procedures).
   - Record outcome/task completion level.

**Assessment procedures/criteria:**
Vocational instructor will evaluate student product (finish work, time line, etc.).
Communication arts instructor will evaluate grammar, structure, punctuation, etc.
Math instructor will evaluate calculations, accuracy, use of principles, etc.

|  |  |
|---|---|
| **Unit Title:** | **Preparing the Building Site** |
| **Competency Profile:** | Carpentry (1997) |
| **Instructor(s) name:** | Stan Moore |
| **Grade level:** | 11-12 |
| **Teaching time frame:** | 5 days |

**Rationale:** Before actual construction may begin, preliminary planning and preparation has to be done. Without accurate and thorough preparation many problems may occur that will slow down actual construction or may even stop it completely.

**Unit description:** This unit covers locating a building on the building site, squaring the building up, and determining the amount of excavation needed.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 3.1. Establish level/grade using appropriate instrumentation.<br>3.2. Lay out building.<br>3.3. Identify resources for utility locate. | *Mathematics*<br>**MA/I/9-12/1-4/d**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>Computational strategies for the set of real numbers.<br>Models, calculators, computers, charts, graphs, etc., may be used as problem-solving tools.<br>Mathematical problem-solving strategies can apply to all disciplines and real-world problems.<br>Apply the process of mathematical modeling to real-world problem situations.<br>**MA/III/9-12/1-5/a, c, d**<br>Information may be organized in a variety of forms to look for patterns and relationships.<br>Results must be justified.<br>Geometric and number properties.<br>The process of inductive reasoning.<br>The process of deductive reasoning.<br>Make and test conjectures.<br>Follow the mathematical reasoning of others and determine validity.<br>Apply inductive and deductive reasoning. | *Social Studies*<br>**SS/IV.E/9-12/3-5/g-i**<br>How should we analyze and evaluate issues that involve public regulation of private property or shifts in the ownership of land from public to private or private to public?<br>How should individuals use geographic knowledge, skills, and perspectives in solving problems, making decisions, planning for the future, and evaluating public policy decisions?<br>What happens to the public welfare when individuals, economic enterprises, and governments make decisions without considering their geographic implications?<br>Apply geographic knowledge and skills to everyday life.<br>Plan and create effective communications using a variety of methods, forms, and technologies, anticipating the impact on the audience and presenting ideas and opinions in an organized, convincing way.<br>Exchange information, questions, and ideas in discussions, recognizing the perspectives of others. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
|  | **MA/IV/9-12/3/c**<br>Mathematics is used in the real world.<br>Relate and describe the connections within topics of mathematics and other disciplines.<br>**MA/V/9-12/1, 3/a, c**<br>Addition, subtraction, multiplication, and division with real numbers.<br>The appropriate use of technology.<br>Develop, analyze, and explain procedures used for representing and analyzing relationships in tables, verbal rules, equations, and graphs.<br>Analyze and describe relationships and the resulting effects between changes in an independent variable and a dependent variable.<br>**MA/VI/9-12/1-3/b, d, f**<br>Structures of geometric and measurement systems.<br>Properties and relationships of two- and three-dimensional shapes.<br>Geometric shapes can be used to describe the real world.<br>Represent and solve problem situations with geometric models and apply properties of figures.<br>Deduce properties of, and relationships between, figures from given assumptions.<br>Deduce properties of figures using transformations and coordinates. | **SS/IV.E/9-12/3-5/j, k, m**<br>Identify and define current and potential problems and issues concerning people's use of the biosphere; propose alternative solutions, project probable consequences of the alternatives, consider and assess different viewpoints, and evaluate costs and benefits of the alternatives in the light of democratic ideals and aesthetic, practical, and ethical criteria.<br>Explain the reasoning and identify the information that may be used to support a decision.<br>Analyze the duties and responsibilities of individuals in society, and evaluate how individuals in a variety of roles affect their communities and environments. |

**Instructional activity name:** Locating and squaring a building on a site

**Description:** At the end of this activity, the student will be able to (1) obtain information from local building codes and zoning ordinances to make sure the building is within the restrictions, (2) relate the purpose of the codes, (3) set up a transit and take grade shots, (4) compute the difference between elevations, and (5) use the Pythagorean theorem to square the building up.

**Materials/resources required:** 2 - 100' tapes, builder's level, plot plan, steel stakes, copy of local building codes and zoning ordinances, sledge hammer

**Specific directions for organizing and conducting activity:**

1. Research to find the purpose or need for a community to have building codes and zoning ordinances. (SS)
2. From local codes and ordinances, locate and record minimum set back distances for houses from property lines. (SS)
3. Read from a plot plan the distance from property lines the house is to be located to verify that it is within the code. (MA)
4. Either stake out a lot in an open area or use an existing lot (ideally actual lot that building trades program will build the actual house shown on the plot plan.
5. Measure and locate the corner of the house on the lot with a stake. (MA)
6. Use the Pythagorean theorem to square the building up (demonstrate the 3-4-5 method). Using a calculator, calculate the diagonals of the building. Locate remaining corners with stakes. (MA)
7. Set up the builder's level and take grade shots of all corners of the building. (MA)
8. Calculate the difference in elevation of all corners. (MA)
9. Estimate the cubic yards of earth that will have to be excavated to level the site for the foundation. (MA)

**Assessment procedures/criteria:**

1. Write a short paper explaining the purpose of building codes and zoning ordinances.
2. Check the accuracy of the transit set up and the reading of the grade sheet.
3. Give several house sizes and have students calculate the diagonals.
4. Give students a plan of a small house and have them stake it out to check dimensions and squareness.
5. Give students the elevations of an actual staked out house and have them calculate the cubic yards that need excavating.

**Unit Title:** **Communication**
**Competency Profile:** Commercial Art (1990)
**Instructor(s) name:** Jim Scott and Tom Benke
**Grade level:** 11-12
**Teaching time frame:** 2 weeks

**Rationale:** Students will acquire the knowledge and skills to communicate effectively within and beyond the classroom.

**Unit description:** The student will learn to produce camera-ready art for in-school publication.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| G1. Identify planning methods.<br>G3. Produce overlay art.<br>G5. Produce pasteup with type/photos.<br>G7. Produce printer specs.<br>G8. Crop and scale photos. | *Mathematics*<br>**MA/I/9-12/1/b**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>Recognize and formulate problems from situations within and outside mathematics.<br>**MA/VI/9-12/2/c**<br>Properties and relationships of two- and three-dimensional shapes.<br>Classify figures in terms of congruence and similarity and apply these relationships. | *Social Studies*<br>**SS/IV.E/9-12/1/b**<br>How have private and public decisions had long-term, far-reaching geographic effects (on resources, ecosystems, trade, etc.), sometimes giving rise to issues and controversies? How should such issues be analyzed and addressed?<br>Conduct research including *field inquiries* involving interviews or surveys to answer questions, discover patterns and relationships, and evaluate information and ideas. |
|  | *Communication Arts*<br>**CA/IV/9-12/3/a, b**<br>Make informed decisions regarding communications.<br>Analyze appropriateness of communications for various audiences and purposes.<br>Create accurate and aesthetically pleasing communications. |  |

**Instructional activity name:** Students will create a newspaper/publication.
**Description:** Students will gather information from various sources (e.g., social studies/English classes) and use professional layout techniques to create an in-school publication.
**Materials/resources required:** Proportion wheel, technical pens, paper, specifications, T-square, triangles, and various manuscripts/articles

**Specific directions for organizing and conducting activity:**
Students will organize materials in a manner that will allow them to produce the necessary camera-ready art for preparation by the vocational print shop.

**Assessment procedures/criteria:** Students will be assessed on the organization of materials and production of the camera-ready art.

**Title:** **Salon Management**
**Competency Profile:** Cosmetology (1989)
**Instructor(s) name:** Pat See and Linda Siess
**Grade level:** 11-12 and adult
**Teaching time frame:** 2 weeks

**Rationale:** Students will demonstrate advertising forms through communication and fine arts abilities by gathering ideas, information, and skills.

**Unit description:** Students will prepare and design an advertising campaign using multipurpose media.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| f3. Demonstrate methods of advertising a salon.<br>f7. Demonstrate how to sell services and products. | ***Communication Arts***<br>**CA/I/9-12/2/a**<br>Locate and gather information and ideas.<br>Plan and design methods to collect reliable data for particular purposes and audiences.<br>**CA/I/9-12/3/b, d, f**<br>Process, organize, and evaluate information and ideas.<br>Select useful ways to organize materials.<br>Evaluate materials for faulty reasoning, biases and propaganda.<br>Draw conclusions and form opinions based on data collected. | ***Fine Arts***<br>**FA/IV.D/9-12/3/a**<br>Know how to employ a wide range of subject matter, symbols, and meaningful images into their artwork.<br>Identify a variety of sources for ideas and demonstrate how these sources help produce new ideas.<br>**FA/IV.D/9-12/4/b**<br>Know how the visual arts can be used to reflect their feelings and ideas.<br>Apply media, techniques, and processes with sufficient skill, confidence, and sensitivity so that their intentions are carried out in their artworks.<br>**FA/IV.D/9-12/6/c**<br>Know the multifaceted interplay of different media, styles, and forms.<br>Effectively prepare artworks for display. |

**Instructional activity name:** Salon Management - Advertising
**Description:** Students will research newspapers, salons, radio stations, and print shops to create an ad layout using gathered ideas and materials.
**Materials/resources required:** Print shops, salons, newspaper

**Specific directions for organizing and conducting activity:**
Communications: Students will find examples of brochures, newspaper ads, and radio spots that present information in different ways. Students will visit salons to discuss successful media usage.

Fine Arts: Students will work with the graphic design and/or printing teacher on planning layouts. Students will also make a poster advertisement.

**Assessment procedures/criteria** (poster):
Proper language and grammar
Layout form,
Design appeal

**Unit Title:** **Professionalism**
**Competency Profile:** Culinary Arts (1989)
**Instructor(s) name:** Teresa Stark and Paul Santaularia
**Grade level:** 9-12
**Teaching time frame:** 1-2 weeks

**Rationale:** Demonstrate knowledge of the history of culinary arts.

**Unit description:** Overview of the culinary arts; principles, theory, and work ethic needed to be employable

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| B1. Demonstrate knowledge of the history of culinary arts. | *Communication Arts*<br>**CA/I/9-12/1/a-d**<br>Read, view, listen to, and evaluate written, visual, and oral communications.<br>Analyze and evaluate literary devices and techniques.<br>Make connections to previously read or viewed material or to real situations.<br>Analyze the elements of fiction and nonfiction, including setting, plot, characters, theme, purpose, points of view, style, and tone.<br>Analyze and evaluate cause and effect of relationships in fiction and nonfiction. | *Fine Arts*<br>**FA/IV.A/9-12/2/a**<br>Know that throughout history, artists have made significant contributions to society.<br>Identify artists who have achieved regional, national, and international recognition; the roles they have played as well as the ways their works have influenced thinking.<br>**FA/IV.A/9-12/3**<br>Know a variety of ways in which historical and current issues are addressed in the world of art. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| | **CA/I/9-12/2/a, c, d, e**<br>Locate and gather information and ideas.<br>Plan and design methods to collect reliable data for particular purposes and audiences.<br>Conduct searches using a variety of technologies and resources.<br>Select applicable primary and secondary resources from print and nonprint materials.<br>Access community resources.<br>**CA/I/9-12/5/a-d**<br>Analyze and evaluate how language and communications influence and reflect the cultures or eras in which they are created.<br>Read, view, listen to and respond to literature, film, and other texts from diverse cultures and eras.<br>Determine relationships between literature and other communications and their historical and/or cultural contexts.<br>Analyze and draw conclusions about the addition/deletion of words to a language and the changes in the meanings of words over time.<br>Create communications that reflect cultural, historical or current perspectives on a topic/issue. | ***Science***<br>**SC/I.A/9-12/2/a**<br>Publication and presentation of scientific work with supporting evidence are required for critique, review, and validation by the scientific community. The presentation of such work adds to the body of scientific knowledge and serves as background for subsequent investigations in similar areas.<br>Present arguments based on scientific investigations which include detailed procedures, graphs and tables, and conclusions; participate in follow-up discussions by responding to alternative positions.<br>**SC/I.A/9-12/3/a**<br>Controlling all variables that might influence an experiment is important. Sometimes it is not possible, for practical or ethical reasons, to control some conditions, but a wide range of observations of natural occurrences can reveal patterns.<br>Make systematic observations (nonexperimental) of natural objects or events to discern patterns, formulate explanations, support a thesis, or make predictions.<br>**SC/I.B/9-12/1/a**<br>The testing, revising, and occasional discarding of theories leads to increasingly better understanding, but not to absolute truth. New ideas, therefore, usually grow slowly from contributions by many investigators.<br>Formulate questions for scientific investigations that indicate conceptual insights and a depth of understanding of the historical development of the idea or issue to be investigated. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |

|  |  | **SC/II.A/9-12/1/a**<br>Social and economic forces, such as personal values, consumer acceptance, patent laws, the federal budget, current regulations, media attention, and economic competition strongly influence the direction of progress of science and technology. Progress in science and technology, on the other hand, often results in many ethical, legal, and public policy issues.<br>Discuss the scientific, technological, and political aspects of major challenges to society. Describe how each of these aspects influences public policy formulation in dealing with the challenges.<br>**SC/II.A/9-12/2/a**<br>Human beings have a huge impact on other species, their environments, and technology. These impacts include reducing the amount of habitat available, interfering with food sources, changing the temperature and chemical composition of their habitats, introducing foreign species, and altering organisms directly through selective breeding and genetic engineering.<br>Analyze and evaluate how specific technological solutions may impact the environment in areas such as habitat loss, disruption of the food web, and temperature and chemical changes. |

**Instructional activity name:** Cooking in a Different Era
**Description:** Students should show knowledge of various cooking styles, methods, and events that shape the way we cook today.
**Materials/resources required:** Encyclopedias, videos, culinary texts, computer (Internet), library

**Specific directions for organizing and conducting activity:**
Fine Arts--To include different types of cooking vessels used throughout history.
Science--Coordinate section on the evolution of cooking methods to include transfer of heat, metallurgy, refrigeration and transportation, and how the evolution relates to how food is prepared today.
Communications--Coordinate reading assignment/report to the development of Culinary Arts throughout history.

**Assessment procedures/criteria:**
Fine Arts--Display various types of cooking vessels used throughout history.
Science--Display different food preservation methods used throughout history to include smoking, curing, canning, refrigeration, cryovac, radiation.
Communications--Assess by completeness of explanation.

**Title:** **Student Salon**
**Competency Profile:** Electrical Trades (1989)
**Instructor(s) name:** Pat McKee
**Grade level:** 11-12
**Teaching time frame:** 1-2 weeks

**Rationale:** Students will demonstrate (within and across content areas of cosmetology, consumer education, and electrical trades) the ability to apply acquired information and skills to contexts, workers and consumers.

**Unit description:** Students will propose building and furnishing a salon by outlining facility needs, market potential, and electrical capacity (needs) involved in the overall process.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| D2. Identify commercial wiring practices using the NEC as a reference. | *Communication Arts*<br>**CA/I/9-12/1/b**<br>Read, view, listen to, and evaluate written, visual, and oral communications.<br>Make connections to previously read or viewed material or to real situations. | *Social Studies*<br>**SS/II.A/9-12/4/m**<br>How do laws and government policies affect civil society, individuals, and groups?<br>Examine problems and proposed solutions from multiple perspectives. |

**Instructional activity name:** Commercial Entrance/Circuitry Codes
**Description:** Students will research local and NEC codes as they relate to commercial application in a salon and list area codes directly involved in this project.
**Materials/resources required:** Local zoning codes, local electrical codes, and National Electrical Codes (NEC).

**Specific directions for organizing and conducting activity:**
Electrical Trades--Students will research and apply electrical codes to proposed project by making oral/visual presentations in class. Reports and diagrams should be used. They should comply with NEC and OSHA codes.

Cosmetology--Students will determine physical (electrical) needs for a successful salon by referring to model shop requirements and by making on-site visits to local shops. Diagrams and visual layouts will be assessed. (State regulations should be used.)

Consumer education--Students will prepare a survey to determine needs and market potential for determining the community salon's location. Financial requirements could be an added area for learning.

**Assessment procedures/criteria:**
Written reports will be assessed for necessary content (by including the minimum number of details and codes).
Visual presentations will be evaluated for clarity, detail, and overall effectiveness.

**Title:** **Ohm's Law**
**Competency Profile:** Electronics (1996)
**Instructor(s) name:** Neil Preston
**Grade level:** 11-12
**Teaching time frame:** 2 days

**Rationale:** Ohm's Law is one of the fundamental concepts of all electrical devices and circuits used in electrical and electronic systems.

**Unit description:** From information available or given, the student will calculate or estimate the correct value of unknown quantities of voltage, current, resistance, or power.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 2.2. Apply Ohm's Law. | ***Mathematics***<br>**MA/I/9-12/1/a, b, c**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>Use problem-solving strategies to investigate and understand mathematical content.<br>Recognize and formulate problems from situations within and outside mathematics.<br>Organize, develop, and apply integrated mathematical problem-solving strategies to solve problems within and outside mathematics.<br>**MA/I/9-12/2**<br>Computational strategies for the set of real numbers.<br>**MA/I/9-12/3/d**<br>Models, calculators, computers, charts, graphs, etc., may be used as problem-solving tools.<br>Apply the process of mathematical modeling to real-world problem situations. | ***Communication Arts***<br>**CA/I/9-12/1/b, d**<br>Read, view, listen to, and evaluate written, visual, and oral communications.<br>Make connections to previously read or viewed material or to real situations.<br>Analyze and evaluate cause and effect relationships in fiction and nonfiction.<br>**CA/I/9-12/2/c, d**<br>Locate and gather information and ideas.<br>Conduct searches using a variety of technologies and resources.<br>Select applicable primary and secondary resources from print and nonprint materials. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
|  | **MA/I/9-12/4/e**<br>Mathematical problem-solving strategies can apply to all disciplines and real-world problems.<br>Analyze, evaluate, and reflect upon the process(es) used in solving problems.<br>**MA/II/9-12/1/e**<br>The language of mathematics may be used through reading, writing, listening, and speaking.<br>Present mathematical ideals and logical justifications, both written and oral.<br>**MA/II/9-12/2**<br>Mathematical ideas may be represented with visual models.<br>**MA/II/9-12/3/h**<br>Mathematical symbols may be used to represent a variety of situations.<br>Read, write, and talk about mathematical ideas as they relate to real-life applications and multiple workplace situations.<br>**MA/III/9-12/1**<br>Information may be organized in a variety of forms to look for patterns and relationships.<br>**MA/III/9-12/2/a, b**<br>Results must be justified.<br>Make and test conjectures.<br>Defend the validity of their conclusions using mathematical strategies.<br>**MA/III/9-12/4-5/c, d**<br>The process of inductive reasoning.<br>The process of deductive reasoning.<br>Follow the mathematical reasoning of others and determine validity.<br>Apply inductive and deductive reasoning. | ***Science***<br>**SC/I.A/9-12/1**<br>Investigations may involve mathematical procedures to interpret observations, make predictions, describe sets of data, and determine the validity and significance of experimental results.<br>**SC/I.A/9-12/3**<br>Controlling all variables that might influence an experiment is important. |---|---|---|
|  | **MA/IV/9-12/1-3/a, b, c, d**<br>Problems may be looked at in more than one way.<br>Mathematics is used in other subject areas.<br>Mathematics is used in the real world.<br>Recognize and/or derive equivalent representations for a concept.<br>Analyze and relate procedures in multiple representations.<br>Relate and describe the connections within topics of mathematics and other disciplines.<br>Investigate and determine the importance of mathematics in their lives, future careers, and our ever-changing global society.<br>**MA/V/9-12/1-4/a, b, c**<br>Addition, subtraction, multiplication, and division with real numbers.<br>That numbers and their relationships can be represented in multiple forms.<br>The appropriate use of technology.<br>Data can be organized in many forms.<br>Develop, analyze, and explain procedures used for representing and analyzing relationships in tables, verbal rules, equations, and graphs.<br>Analyze the effects of parameter changes on the graphs of functions.<br>Analyze and describe relationships and the resulting effects between changes in an independent variable and a dependent variable. | **MA/VII/9-12/3, 4/a, i**<br>The process required to design and conduct a survey or experiment.<br>The process required to analyze and present data.<br>Interpret and summarize data from charts, tables, and graphs that appear in real-world situations.<br>Collect, plot, and interpret data, including that from a discrete probability distribution.<br>**MA/VIII/9-12/1, 2/b, c, d, i**<br>That mathematical patterns and relationships may be represented in various forms.<br>Mathematical symbols can be used to represent real-world situations.<br>Represent and analyze relationships using verbal rules, tables and graphs as tools to interpret expressions, equations and inequalities.<br>Translate among tabular, symbolic, and graphical representations of functions and model real-world phenomena with a variety of functions.<br>Represent situations that involve variable quantities with expressions, equations, and inequalities.<br>Analyze effects of parameter changes on the graphs of functions using a variety of technologies to gather data.<br>**MA/IX/9-12/2**<br>Procedures for calculator and/or computer use.<br>**MA/IX/9-12/3**<br>Basic algebraic procedures. |

**Instructional activity name:** Electrical Relationships
**Description:** Analyze and demonstrate the relationships between voltage, current, resistance, and power.
**Materials/resources required:**
Lab exercise: Multimeter(s), variable voltage source, resistors of various values, lamps
Science: Text references
Communications: Text references

**Specific directions for organizing and conducting activity:**
Math, science, communications, and electronics instructors meet to coordinate lesson plans and timetables.
Science teacher presents lesson concepts.
Math teacher presents problem solving and analysis.
Electronics class performs laboratory exercise(s).
Communications class reads, analyzes, discusses, and reports on conclusions.

**Assessment procedures/criteria:**
Students will demonstrate by examination an intuitive (how and why) understanding of the electrical relationships by explaining and predicting the behavior of electric circuits under varying conditions.

Students will demonstrate by examination the ability to solve problems, to quantitatively analyze the operation and action of electrical circuits.

Students will accurately demonstrate to the electronics instructor the operation and behavior of circuits by constructing and measuring circuit quantities and comparing to analysis and predictions.

Students will detail their observations and conclusions by preparing a laboratory report to be evaluated by the language arts instructor for language usage and the science and/or electronics instructor for accuracy.

**Title:** PLC Use in Industrial Electronics
**Competency Profile:** Electronics (1996)
**Instructor(s) name:** Ken Garthe
**Grade level:** 11-12
**Teaching time frame:** 3-4 weeks

**Rationale:** To gain knowledge of programmable controllers, which are widely used in industry.

**Unit description:** Build a float for a school parade; artwork and flashing lights are included.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 1.2. Identify electrical hazards.<br>1.3. Identify and practice shop safety, including eye protection and environmental hazards.<br>1.5. Demonstrate safe and proper use of hand tools.<br>2.1. |---|---|---|
| 3.2. Evaluate and test batteries.<br>7.2. Measure voltage, current and resistance using multimeters (VOM, EVM, DVM).<br>17.1. Create simple ladder logic diagrams/programs.<br>17.2. Install and configure programmable logic controllers. | ***Mathematics***<br>**MA/I/9-12/1**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>**MA/I/9-12/2**<br>Computational strategies for the set of real numbers.<br>**MA/I/9-12/3**<br>Models, calculators, computers, charts, graphs, etc., may be used as problem-solving tools.<br>**MA/III/9-12/4**<br>The process of inductive reasoning.<br>**MA/III/9-12/5**<br>The process of deductive reasoning.<br>**MA/IV/9-12/3**<br>Mathematics is used in the real world.<br>**MA/VI/9-12/1**<br>Structures of geometric and measurement systems.<br>**MA/VI/9-12/2**<br>Properties and relationships of two- and three-dimensional shapes.<br>**MA/VI/9-12/3**<br>Geometric shapes can be used to describe the real world.<br>**MA/IX/9-12/2**<br>Procedures for calculator and/or computer use.<br>**MA/IX/9-12/4**<br>Geometric relationships. | |

**Instructional activity name:** Install and Configure PLC Program
**Description:** Plan, organize, and construct a float using the assistance of multiple disciplines (electronics, drafting, math, communication arts, fine arts, carpentry).
**Materials/resources required:** Programmable controller, lights, wiring, lumber, plywood, paint, flatbed truck or trailer.

**Specific directions for organizing and conducting activity:**
All departments participate in an organizational meeting to plan the float.
The art department determines which displays are involved.
The drafting and math departments lay out the displays and dimensions of the float.
The communication arts department writes and distributes plans to other departments.
The electronics department installs, wires, and configures all wiring.

**Assessment procedures/criteria:**
Math and drafting: Can all displays fit into the space provided using the requested dimensions?
Communication arts: Are written instructions clear and comprehensive?
Electronics: Does available power meet the requirements?

**Unit Title:** **Preparing Customer Layouts--Production Art**
**Competency Profile:** Graphic Communications/Printing (1997)
**Instructor(s) name:** Ken Conaway and Jim Scott
**Grade level:** 11-12
**Teaching time frame:** 1 week

**Rationale:** The student will apply the principles of ratio and proportion to the Printing and Graphic Communications industry to solve practical problems.

**Unit description:** Scaling with the proportion wheel

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 3.1 Prepare a rough layout.<br>3.2 Indicate to layout person how photographs and headings are to be printed.<br>3.3 Indicate percentage of enlargement or reduction required on photos.<br>3.4 Indicate typefaces and point sizes to be used.<br>3.5 Make dummy layout of multi-page printed product for signature specifications.<br>3.6 Indicate crop marks for pictures.<br>3.7 Produce a comprehensive layout.<br>3.8 Revise layouts to customer specifications. | *Mathematics*<br>**MA/I/9-12/1/b**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>Recognize and formulate problems from situations within and outside mathematics.<br>**MA/V/9-12/2/a**<br>Numbers and their relationships can be represented in multiple forms.<br>Develop, analyze, and explain procedures used for representing and analyzing relationships in tables, verbal rules, equations, and graphs.<br>**MA/VI/9-12/2/c**<br>Properties and relationships of two- and three-dimensional shapes.<br>Classify figures in terms of congruence and similarity and apply these relationships. | *Social Studies*<br>**SS/III.A/9-12/1/c**<br>What factors shape the *public agenda* and *public opinion*? How do/should they influence political events and developments?<br>Use technological tools and other resources to locate, select, and organize information. |

**Instructional activity name:** Finding Percentages and Ratios
**Description:** Apply the principles of ratio and proportion to printing and graphic communications by calculating percentages of enlargement or reduction of artwork.
**Materials/resources required:** Proportion wheel, writing pens, paper, artwork, specifications.

**Specific directions for organizing and conducting activity:**

1. Measure existing art.
2. Identify final size.
3. Position top wheel to match appropriate spot on lower wheel.
4. Identify and read indicator in wheel window.
5. Record percentages shown on art.

**Assessment procedures/criteria:** Students will be assessed on the accuracy of their calculations in enlarging or reducing the artwork.

|  |  |
|---|---|
| **Title:** | **Proper Tapping Procedures** |
| **Competency Profile:** | Machine Tool Technology (1996) |
| **Instructor(s) name:** | Ron Bays and Jack Miller |
| **Grade level:** | 11-12 |
| **Teaching time frame:** | 1/2 hour |
| **Rationale:** | To improve students' ability in the essential skills of drilling and tapping holes. |
| **Unit description:** | Being able to calculate proper size tap drill for hole diameter, to determine proper revolutions per minute (rpm) for tap drill, to select the correct size of center drill and rpm for center drill, to countersink hole to correct diameter to be able to start tap, to select the method of using tap and tapping fluid, starting tap square to hole, and to tap hole. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 2.2. Determine tap drill size with formula and charts.<br>2.9. Calculate feeds and speeds.<br>8.7. Cut threads with hand tap.<br>11.7. Select and apply cutting fluids.<br>11.10. Countersink hole to specifications. | *Mathematics*<br>**MA/V/9-12/1/a**<br>Addition, subtraction, multiplication, and division with real numbers.<br>Develop, analyze, and explain procedures used for representing and analyzing relationships in tables, verbal rules, equations, and graphs.<br>**MA/VI/9-12/1/d**<br>Structures of geometric and measurement systems.<br>Deduce properties of, and relationships between, figures from given assumptions. | *Science*<br>**SC/I.A/9-12/3**<br>Controlling all variables that might influence an experiment is important. Sometimes it is not possible, for practical or ethical reasons, to control some conditions, but a wide range of observations of natural occurrences can reveal patterns.<br>**SC/I.A/9-12/4**<br>Technological tools and techniques extend human capabilities to perform investigations in more detail and with greater accuracy and precision.<br>**SC/IV.B/9-12/2**<br>The action of all forces can be explained by Newton's Laws of Motion that are used to predict changes in linear and/or rotational motion. |

1247

1248

**Instructional activity name:** Classroom and Shop Activities
**Description:** Cutting internal threads with a hand tap
**Materials/resources required:** Tap drill, center drill, countersink, cutting oil, blueprint or sketch, material to be drilled and tapped.

**Specific directions for organizing and conducting activity:**

1. Students use communication skills in writing a procedure for doing this operation.
2. Instructor should check to make sure the hole is the proper size.
3. Instructor should hand out proper size tap only after students ask for the proper size tap.
4. Students should give instructor the proper RPM for tap drill, center drill and countersink before being allowed to turn on machine.
5. Students obtain all tools and materials needed.
6. Students perform machining operation to complete the part.
7. Students follow EPA and OSHA regulations while practicing work habits that will avoid health and physical risk to self or others.

**Assessment procedures/criteria:** The student should perform each of the operations correctly. They will also be assessed on the appearance and fit of the part.

| | |
|---|---|
| **Title:** | **Everyone's Home** |
| **Competency Profile:** | Masonry (1989) |
| **Instructor(s) name:** | Ray Herschleb |
| **Grade level:** | 12 |
| **Teaching time frame:** | 2-3 weeks |

**Rationale:** The student will be able to lay out and construct a model of a "World Home" (e.g., relevant to personal, social, financial, and family needs).

**Unit description:** The student will decide when, where, how, and why they are building a home of their design. They need to incorporate cultural, artistic, aesthetic, practical, safe, and lasting appeal into their design.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| G19. Lay out and construct an outdoor structure. | *Mathematics*<br>**MA/I/9-12/1**<br>Problem-solving strategies such as organizing data, drawing a picture, looking for a pattern, modeling, researching, and algebraic strategies.<br>**MA/VIII/9-12/1-2/c**<br>Mathematical patterns and relationships may be represented in various forms.<br>Mathematical symbols can be used to represent real-world situations.<br>Translate among tabular, symbolic, and graphical representations of functions and model real-world phenomena with a variety of functions. | *Social Studies*<br>**SS/IV.D/9-12/2/o**<br>How do some personal and business economic decisions affect the public good in the community, nation, and world? How could those decisions be analyzed and evaluated?<br>Identify tasks that require a coordinated effort and work with others to complete those tasks.<br>**SS/IV.E/9-12/1**<br>How have private and public decisions had long-term, far-reaching geographic effects (on resources, ecosystems, trade, etc.), sometimes giving rise to issues and controversies? How should such issues be analyzed and addressed? |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| | *Fine Arts*<br>**FA/IV.A/9-12/1/a**<br>Know that a variety of cultural themes and artistic styles exist. Analyze themes in works of art from different times and cultures.<br>**FA/IV.A/9-12/4**<br>Know that there are numerous functions for the visual arts within our communities.<br>**FA/IV.A/9-12/6/a**<br>Know how the visual arts can assist in developing an in-depth understanding of the world in which students live.<br>Analyze relationships of works of art to one another in terms of history, aesthetics, and culture, justifying conclusions and using such conclusions to inform their own artmaking. | *Science*<br>**SC/VIII.A/9-12/2**<br>Human decisions concerning the use of resources can alter the stability and biodiversity of ecosystems.<br>**SC/VIII.A/9-12/3/a, b**<br>Increased demand for natural resources requires global cooperation and long-term planning to ensure the resource needs of successive generations will be met.<br>Compare the use of natural resources in developing countries to the use in industrialized nations.<br>Discuss how technology has provided a more efficient use of resources and extended their availability. |

**Instructional activity name:** My House

**Description:** Each student will have a model base equal to a scaled-down version of one acre. Each will have $100,000 to design and build a home suitable to accommodate their family of four.

**Materials/resources required:** 1x2s, 3/8" plywood, metal mesh, sheetrock mud (for contours in land), ¼" plywood (house walls), tar paper for roofing, paints, rocks/gravel, sealers, pencil scale, ruler, trowel, paper

**Specific directions for organizing and conducting activity:**

1. Each student will start by assembling a 2' square model base. Use 1x2s for walls with 3/8"plywood for a base. Use safe procedures to protect oneself.
2. Students will sketch their ideal homes to scale (1/8" = 1') and decide where to place it on their property. Local zoning rules, laws, and codes apply.
3. Each property must have a hill/valley (no higher or lower than 8' elevation) employed in layout. At least one street must border the property.
4. Home placement and/or style must be congruent to neighboring properties, accommodating to ecosystems, and be placed for maximum heat/cold efficiency.
5. The students will keep a daily log of progress and expenditures.
6. Students will be responsible for their own time line and cleanup.
7. Research (library, on-line, periodicals, classroom texts) will be noted for time, date, and page(s) used. These will be a part of their presentation.

**Assessment procedures/criteria:** Students will be assessed on demonstrated professionalism and ethical language, good posture, and gesturing during their culminating presentations. Forty-five minutes will be scheduled for each presentation. Everyone in the audience will have a review/scoring sheet to grade the presenter on completion, style, and rule adherence. *(See following page.)*

**Title:** **Soil, Waste and Vent Systems**
**Competency Profile:** Plumbing (1989)
**Instructor(s) name:** Michael George
**Grade level:** 11-12
**Teaching time frame:** 2 weeks

**Rationale:** This unit is an integral part of residential plumbing. Soil and waste systems must be connected to private systems or city sewers, and excavating a trench is needed to accomplish this system.

**Unit description:** To develop the skills needed to install drain lines for residential plumbing. Skills include use of transit, measuring devices, levels, and shovels, as well as proper carrying techniques and reading plans and surveys.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| D13. Excavate a trench and maintain desired grade. | *Communication Arts*<br>**CA/I/9-12/6**<br>Apply information, ideas processes and skills learned in the study of communication arts to new situations and tasks. | *Science*<br>**SC/IV.C/9-12/2/a**<br>The ratio of output work to input energy is the efficiency of a machine or process and is always less than 100%. Power is the rate at which work is done.<br>Analyze and describe the relationship among work, power, and efficiency.<br>**SC/VI.A/9-12/1**<br>Variations in the physical conditions and chemical composition of soil are a result of the type of rock from which it came, climate, the process by which it was deposited, and biological activities. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
|  | *Mathematics*<br>**MA/V/9-12/1**<br>Addition, subtraction, multiplication, and division with real numbers.<br>**MA/VI/9-12/1-3/i**<br>Structures of geometric and measurement systems.<br>Properties and relationships of two- and three-dimensional shapes.<br>Geometric shapes can be used to describe the real world.<br>Apply an understanding of perimeter, area, volume, angle measure, capacity, weight, and mass.<br>**MA/IX/9-12/1-3**<br>Properties of real numbers.<br>Procedures for calculator and/or computer use.<br>Basic algebraic procedures. | *Social Studies*<br>**SS/III.E/9-12/2/e**<br>What are the causes and effects of change in the physical and human characteristics of one's locality and of other places?<br>Interpret geographic sources (maps, globes, aerial photographs, models, databases, remotely sensed images, Geographic Information Systems, etc.) and other sources (news media, etc.) to learn about locations, features, and *spatial relationships* among places and regions. |
|  | *Health Education/Physical Education*<br>**HP/IV.D/9-12/2/a**<br>Equilibrium, motion, force, and Newton's laws constitute the basic principle of mechanics related to the fundamentals of physical activity.<br>Apply the processes and knowledge learned from scientific principles to gain more efficient use of the body in daily activities, e.g., lifting, reducing injury.<br>**HP/V.C/9-12/2/b**<br>Proper treatment for exercise-related injury aids in recovery rate for return to exercise. Following proper treatment procedures is important for individuals. Administering emergency treatment to others, such as basic first aid and CPR, is important. An awareness of how to activate Emergency Medicine System (EMS) is also necessary.<br>Demonstrate competence in basic first aid and CPR. |  |

**Instructional activity name:** Identify soil composition and physical structure in sample trench.
**Description:** Students identify factors in soil composition that will affect trench excavation and securing the walls and drain line.
**Materials/resources required:** Open sample trench (or 4' by 4' excavation), soil charts/graphs, soil testing kit (if necessary or available).

**Specific directions for organizing and conducting activity:**

1. Science instructor would be informed of a time period when open trench would be available for the class to observe and investigate.
2. Science instructor would provide worksheet that would help science students understand how soil composition affects weight and excavation, how sandy soils cave in, and how clay and rocky soils are heavier to remove.
3. Then, teacher could incorporate relationship between soil composition and power needed to excavate.

**Assessment procedures/criteria:** The student should be able to identify different soil types, how they compact, and how they differ in weight.

*****

**Instructional activity name:** Trenching Safety
**Description:** Students should be trained in basic first-aid treatments and CPR.
**Materials/resources required:** CPR trainer, training dummy, first-aid manuals, primitive trench.

**Specific directions for organizing and conducting activity:**
The health instructor should be asked to include this training in his/her program. CPR certification credit will be given to students acquiring this training. The health instructor should be informed of the need for this training and certification, as well as the dangers involved while trenching, such as plumbers being buried alive.

**Assessment procedures/criteria:** If possible, Red Cross certification in CPR and basic Red Cross first-aid training.

**Instructional activity name:** Incorporation of Weight Training as it Relates to Activities in Plumbing
**Description:** Plumbing students should be taught current methods for lifting and exerting force (shoveling).
**Materials/resources required:** Plumbing materials could be provided to PE instructors to help train students in lifting and carrying procedures. Exercises that use the same muscles as shoveling could be developed.

**Specific directions for organizing and conducting activity:**

1. Cast iron and schedule 80 plastic pipe in 4-6' lengths could be given to the PE instructor to teach students proper lifting and carrying techniques. These same materials could be used to develop muscles and endurance.
2. If his/her scheduling allows, the PE instructor could work with the plumbing class to teach these methods of lifting and carrying.
3. The PE instructor should be made aware of the need for plumbing students to be capable of shoveling; work on a program to develop these muscles is desired.

**Assessment procedures/criteria:** Students should be capable of excavating a 4' x 4' hole in allotted time and also be capable of carrying a 6' length of cast iron and 10' length of PVC pipe.

* * * * *

**Instructional activity name:** How Angles Relate to Trenching
**Description:** Demonstrate how geometric angles are used when running sewer lines.
**Materials/resources required:** Worksheet that includes obstacles that the student must run his/her trench around (e.g., trees, utility poles, buildings).

**Specific directions for organizing and conducting activity:**

1. Worksheet could be given to math/geometry teacher to incorporate into his/her curriculum, or the math teacher could help with presentation and development within the plumbing class.
2. Worksheet would include a starting point (building drain) and finishing point (city sewer top). Obstacles would be identified on the sheet, so the student(s) must decide the course of line and use legal plumbing fittings (angles) to run line.

**Assessment procedures/criteria:** Completed worksheet would be graded on accuracy and code compliance.

**Instructional activity name:** Transit Use
**Description:** Have math teacher incorporate into his/her class the proper use of transit, or have math teacher come into the plumbing class (if scheduling allows) to teach and evaluate students' abilities to subtract and add.
**Materials/resources required:** Transit/measuring rod or practice sheets with different measurements; basic math worksheets, if needed.

**Specific directions for organizing and conducting activity:**
1. Math teacher could be supplied practice surveying sheets that require students to add and subtract lengths in feet and inches. Or, the math teacher could be given a transit and measuring rod to allow students to secure their own measurements.
2. If available, the math teacher could present during the plumbing class time to help students in this area or with presentation.

**Assessment procedures/criteria:** A scored worksheet would be used to check students' abilities.

*****

**Instructional activity name:** Use of Geographic Maps to Locate Benchmarks
**Description:** Local plat maps could be used by students to locate a benchmark before excavating a trench.
**Materials/resources required:** Local surveys and plats, possibly newer photos to include development.

**Specific directions for organizing and conducting activity:**
1. Social studies teacher could be asked to help locate the nearest benchmark to the school.
2. English teacher could help develop the chart of measurements in his/her class.
3. Students would be asked to list different identifying factors that lead from benchmark to trench.
4. Students would learn how geographical features affect the location and development of plumbing systems.

**Assessment procedures/criteria:** Graph or chart of measurements and identifying factors such as road, curb, and location of tap.

|---|---|
| **Title:** | **VICA Leadership** |
| **Competency Profile:** | VICA/Leadership (Industrial Education Profiles) (1990-96) |
| **Instructor(s) name:** | Milton Moore and Chuck Berendzen |
| **Grade level:** | 10 to adult |
| **Teaching time frame:** | 2 weeks |
| **Rationale:** | To provide a concept of teamwork and enable students to work with other trades, areas, or classes to construct a project. They will solve problems and make complex, responsible decisions that are necessary to work as a team. |
| **Unit description:** | Teamwork is a unit of study designed to impact a number of classes by enabling students to identify factors related to working with others in a round table discussion involving problem-solving. The unit can be applied to real-world situations. |

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| See following pages. | *Communication Arts*<br>**CA/I/9-12/2/a, c, d**<br>Locate and gather information and ideas.<br>Plan and design methods to collect reliable data for particular purposes and audiences.<br>Conduct searches using a variety of technologies and resources.<br>Select applicable primary and secondary resources from print and nonprint materials.<br>**CA/I/9-12/6/a, d**<br>Apply information, ideas, processes, and skills learned in the study of communication arts to new situations and tasks.<br>Select effective communication strategies and formats to develop and clarify new ideas and perspectives.<br>Provide support for observations and opinions.<br>**CA/II/9-12/3/b, c**<br>Create print and nonprint communications for various audiences and for a variety of purposes.<br>Analyze appropriateness and effectiveness of language use, considering audience and purpose.<br>Communicate effectively in a variety of real or simulated workplace situations. | *Mathematics*<br>**MA/VI/9-12/2**<br>Properties and relationships of two- and three-dimensional shapes.<br>**MA/VI/9-12/3**<br>Geometric shapes can be used to describe the real world. |

**Instructional activity name:** VICA Display, Promotional Bulletin Board or Float in a Parade
**Description:** Given the following activity, various classes (such as drafting, building trades, electronics, etc.) will identify facts related to team building. Students should evaluate the theme and design a few drawings. All classes in VICA should meet at a round table discussion to choose a design, divide work per class, and work as a team.
**Materials/resources required:** Wood, metal, paper, pencils, computers, and any other materials deemed necessary by the design or the class involved in the project.

**Specific directions for organizing and conducting activity:**
The teachers will meet to discuss and organize the lesson. Responsibilities must be spelled out. Each teacher will develop a plan for his or her area of responsibility and expertise. The teachers will meet again to plan and make sure that all involved are in agreement and understand the total focus of the activity. Each will proceed with their students to complete the individual class work and bring the integrated activities together on the day planned.

In the drafting class, each student will design a project. The class will judge the designs and bring the three best ones to a round table discussion group. The round table group will select one of the three and delegate work by trade area. Each area will divide their work into small groups. Electronics classes will work on the lighting required, as well as any rotary motion used in the project. The frame and/or the covering for the display could be done by the building trades, welding, machine tool, and/or cabinetmaking classes, depending on the design and materials selected. Finishing can be done by auto collision, building trades, drafting, or graphics classes, depending on design and availability. The communications, graphics, or drafting class will produce a notebook (which is part of the project) that tells how it was done and includes photos of the work in progress. Computer classes will produce a spreadsheet of expenses and keep track of the time everyone spends working on the project. Social studies classes can keep track of regulations and if the project is following those regulations.

Assembly of all components will be completed by all students. The actual finished projects may be built as a unit or as modular components. (This approach would let classes do more independent work but would require more quality control and supervision.) The evaluations/assessments will complete the project. Publicity of the project needs to be on-going, from planning through completion, as well as when, where, and how it is going to be used. Teachers can contact the local media to cover the experience and get photos of the group involved in active, integrated learning.

This activity could incorporate the following competencies and/or duty bands:

**Drafting** (1996)
3.3. Construct freehand sketches.
4.5. Prepare orthographic drawings (3rd angle).
21.4. Demonstrate interpersonal skills.

**Electronics** (1996)
3. Power Supplies
10. Microprocessors/ Microcontrollers
11. Circuit Construction Techniques
17. Industrial Electronics

**Welding** (1996)
2. Basic Skills
3. Print Reading
4. Layout, Fit-Up, and Fabrication
5. Oxyfuel Cutting/Brazing
6. Shielded Metal Arc - General
16. Visual Weld Testing

**Carpentry** (1997)
1.3. Identify and use measuring and layout tools.
1.5. Identify and use nails and fasteners.
2.1. Read and interpret working drawings.

**Machine Tool** (1996)
3. Performing Measurement
4. Blueprint Reading
8. Performing Layout and Bench Work
11. Operating Drill Presses
12. Operating Lathes
13. Operating Milling Machines

**Cabinetmaking** (1993)
B2. Set up and operate table saw safely and accurately.
B3. Set up and operate radial arm saw safely and accurately.
B5. Set up and operate jointer safely and accurately.
C. Joint Construction
D. Gluing and Clamping Procedures
E. Design and Layout Procedures
F. Cabinetry Layout
I. Plastic Laminates Construction

**Commercial Art** (1990)
D. Fundamentals of Design
F. Specialty Design
G. Production/Camera-Ready Art

**Assessment procedures/criteria:** Students will be assessed on comprehension of the subject matter, participation in various aspects of the project, completion of a checklist for the display, and project quality and its presentation.

**Unit Title:** **Print Reading**
**Competency Profile:** Welding (1996)
**Instructor(s) name:** Roger Day
**Grade level:** 11-12
**Teaching time frame:** 2 class periods

**Rationale:** Understand the basic concept of layout, including physical size, volume, limitations, and possibly weight requirements

**Unit description:** Student will be working with layout procedures, bend allowances, basic tools, and how material thickness affects layout and fabrication techniques.

| Competencies (Tasks) | Frameworks (To Know and To Do) | Frameworks (To Know and To Do) |
|---|---|---|
| 4.1 Make layout of material for plate, structural, and pipe fabrication. | *Mathematics*<br>**MA/V/9-12/1-3**<br>Addition, subtraction, multiplication, and division with real numbers.<br>Numbers and their relationships can be represented in multiple forms.<br>The appropriate use of technology. | |

**Instructional activity name:** Construction of a fuel tank
**Description:** Students use math to calculate volume and weights (empty and filled) and physical size of a manufactured fuel tank in variable material types and thicknesses.
**Materials/resources required:** Paper and pencil

**Specific directions for organizing and conducting activity:**
Students are put into the following situation:

1. You have been hired by a truck manufacturer to manufacture fuel tanks for long-distance trucks. You are given the physical size for the fuel tank to fit and how many gallons of diesel fuel the truck needs to travel approximately 1500 miles.
2. From this point, students are given a fact sheet (e.g., diesel fuel weighs 8 lb. per gallon, steel weighs 10.2 lbs. per square foot at ¼" thick, etc.). The student must calculate volume (area) as per weight for the varying thicknesses of materials in four or five different shapes and wall thicknesses of tanks.
3. Students can also calculate the weight of individual pieces and total weight of completed tank and be given a limiting factor (e.g., they may have a jib hoist that limits their load capacity to 1 ton). Will the hoist safely lift the finished tank from the welding cell onto a conveyor system to be moved to the truck assembly area?

**Assessment procedures/criteria:**
Paper/pencil test. Welding students can use Print Reading, Layout and Fitup Assignment Sheet 3.1 (pg. 133 of the IML *Welding* guide) and Unit IV unit test for knowledge and comprehension retention.

# Missouri's Show-Me Standards and Vocational Education Competencies

## Cross Reference

(Mini Report, September 1997)

## *Foreword*

This database documents the common ground that has existed for years between academic skills and vocational competencies. It is intended to be ***"a model,"*** not *"the model,"* of how vocational and academic educators can work together to strengthen foundation skills needed by students in K-12 grades.

Both components of the Show-Me Standards--knowledge (content) and performance (process)--have been cross-referenced to the vocational competency lists included in this database, as have many Curriculum Frameworks statements.

Because most vocational program are taught in the 9-12th grade levels, suggested academic knowledge and performance skills (Curriculum Frameworks) for **grades 9-12** have been used for this pilot project The only exception is the Exploratory Family and Consumer Sciences course, which is taught in middle and junior high grades, and is therefore, cross-referenced to grades 5-8 Curriculum Frameworks.

Sample activities have been developed for most competency lists, also. The writers of these activities used the crosswalk information to develop actual, "real world" classroom activities that teach/reinforce academic *and* vocational concepts.

This project is intended to provide a **starting point** for school districts working on integrating academic and vocational skills, so customization of the crosswalk is highly encouraged. Both printed and electronic versions of the information are available from the Instructional Materials Laboratory. (See previous page for address and ordering information.) Initial data entry has been done in Microsoft *Access 2.0.*

## *Credits*

This project, which was called "Vocational 21st Century Curriculum" during the development stage, has taken the dedication of **many individuals** to bring it this far. Without the following individual contributors, this work could not have been accomplished.

**Project coordination, Instructional Materials Laboratory, UMC, Columbia, Mo.**
*Administration/vision*
Phyllis Miller, Ph.D., and Harley Schlichting, Ph.D.
*Coordination*
Diane Davis
*Group facilitation*
Rich Branton, Diane Davis, Veronica Feilner, Julie Gibbs, Randy Mertens, Beth Meuschke, Phyllis Miller, Dana Tannehill, Becky Tieman
*Editing*
Rebecca "Becky" Tieman, Stacey Burns
*Data entry*
Marshall Simmons, Elizabeth "Liz" Savio, Katie Larson

**Database design**
Brian Glasgow, Electronic Consultations International, Columbia, Mo.

**Funding and leadership, Department of Elementary and Secondary Education, Jefferson City, Mo.**
Fred Linhardt, Vocational Planning and Evaluation Section
Delbert Lund, Vocational Planning and Evaluation Section
Russ McCampbell, Division of Vocational and Adult Education

**Content specialists/activity writers**

Del Winston, (IE) AC/Heating & Refrigeration
Rick Witt, (ME) Marketing Education

## *Terms and Definitions*

Like any other project, this one has its own language. Here's an explanation of the basic terms:

**Framework:** A state document that articulates benchmark statements for all grade ranges in six disciplines: communication arts, fine arts (comprised of dance, music, theatre and visual arts), health education/physical education, mathematics, science and social studies. Some disciplines address content statements (*to know*), others process statements (*to do*) and some do both. By examining the three-column landscape layout of each discipline, you can tell if there is a direct correlation between a *to know* and a *to do* statement (e.g., communication arts). The benchmark lists *to know* statements in the far left column, *to do* statements in the middle and offers sample activities in the far right column.

**Outstanding Schools Act:** This is the law that announced Missouri's Show-Me Standards and set the process in motion for creating the framework. The Act promotes higher standards in students' knowledge and performance.

**Show-Me Standards:** The Standards define what all Missouri students should know and be able to do upon graduation. It is divided into four performance goals and six knowledge standards. Because these Standards (73 total) have the force of law, all school districts must incorporate them into their curriculum.

**Strand:** Strands are general statements, written in Roman numerals, that organize each discipline within the framework (e.g., Problem Solving, Communication, Reasoning, Connections, etc.)

# *Competency List* (August 5, 1997)

## Agricultural Education

| | |
|---|---|
| 1. | Adv. Crop Production |
| # | Adv. Livestock Production |
| # | Agribusiness |
| 2. | Agricultural Construction |
| 3. | Agricultural Machinery |
| 4. | Agricultural Management and Economics |
| 5. | Agricultural Marketing |
| 6. | Agricultural Power I |
| 7. | Agricultural Power II |
| 8. | Agricultural Science I |
| 9. | Agricultural Science I Supplement |
| 10. | Agricultural Science II |
| 11. | Agricultural Structures I |
| 12. | Agricultural Structures II |
| 13. | Animal Science |
| 14. | Fish and Wildlife Mgmt. |
| 15. | Floristry |
| 16. | Forest Mgmt. |
| 17. | Food Science and Technology |
| 18. | Greenhouse Operation and Mgmt. |
| 19. | Horticulture |
| 20. | Landscaping and Turf Mgmt. |
| • | Leadership I and II |
| • | Leadership and Personal Development for Advanced Students |
| 21. | Processing and Marketing Forest Products |
| • | SAE (Supervised Agri. Experience) Program |

## Business Education

| | |
|---|---|
| 22. | Accounting I |
| 23. | Accounting II |
| 24. | Business and Personal Law |
| 25. | Business Communications |
| 26. | Business Economics |
| 27. | Business Management |
| 28. | Business Technology |
| 29. | Computer Business Applications |
| ★ | Computer Programming |
| 30. | International Business |
| 31. | Introduction to Business |
| 32. | Keyboarding and Keyboard Applications |
| 33. | Mathematics in Business |

## Family and Consumer Sciences Education

| | |
|---|---|
| 34. | Child Care Provider/Assistant |
| 35. | Child Development, Care and Guidance |
| 36. | Clothing and Textiles, Intermediate |
| 37. | Clothing and Textiles, Advanced |
| 38. | Contemporary Living |
| 39. | Core Employment Skills |
| 40. | Custom Sewing |
| 41. | Exploratory FACS |
| • | FACS Leadership, Change, Careers |
| 42. | Family and Consumer Sciences |
| 43. | Family/Consumer Resource Management |
| 44. | Family/Individual Health |
| 45. | Family Living and Parenthood |
| 46. | Fashion/Fabric Consultant |
| ★ | Food and Nutrition - Interm. and Adv. |
| 47. | Food Service Worker |
| ★ | Home Ec I and II |
| ★ | Home Management |
| 48. | Housing, Home Furnishings and Equipment |
| 49. | Industrial Sewing |
| 50. | Nutrition and Wellness |

## Industrial Education

| | |
|---|---|
| 51. | AC, Heating and Refrigeration |
| 52. | Auto Technology |
| 53. | Auto Collision Technology |
| 54. | Building Maintenance |
| 55. | Cabinetmaking |
| 56. | Carpentry |
| 57. | Commercial Art |
| 58. | Cosmetology |
| 59. | Culinary Arts |
| 60. | Diesel Mechanic |

| B 2: Estimate time and cost for job and order parts | MA 1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations | 3.1: Identify problems and define their scope and elements |
| B 3: Obtain appropriate repair information from shop manuals | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspapers, technical manuals) | 1.10: Apply acquired information, ideas and skills to different contexts as students, workers, citizens and consumers |
| B 4: Practice clean and orderly work habits (vehicle, tools and work area) | HP 2: principles and practices of physical and mental health (such as personal health habits, nutrition, stress management) | 4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| C 1: Identify basic function and operation of vehicle mechanical components | SC 1: properties and principles of matter and energy | 1.6: Discover and evaluate patterns and relationships in information, ideas and structures |

**KEY:**
* = may use all "to do" statements
98 = same Frameworks as previous competency
# = same Frameworks as previous competency
99 = "to know" statements may not be applicable

Competency Profile Date: 1994

# Automotive Technology

***Cross-Reference to Show-Me Standards***
***(mini report with words)***

| Duty Band and Task Statement | Knowledge (Content) | Performance (Goals) |
|---|---|---|
| C 2: Identify auto mechanics career opportunities and the duties of a technician | SS 4: economic concepts (including productivity and the market system) and principles (including the laws of supply and demand) | 4.8: Explore, prepare for and seek educational and job opportunities |
| D 1: Check continuity in electrical circuits using test light and voltmeter, oscilloscope and wiring diagram | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspapers, technical manuals)<br>MA 1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>SC 1: properties and principles of matter and energy | 1.1: Develop questions and ideas to initiate and refine research<br>3.1: Identify problems and define their scope and elements |
| D 2: Check for shorts, opens, and grounds | SC 1: properties and principles of matter and energy | 3.1: Identify problems and define their scope and elements |
| D 3: Measure resistance in electrical circuits using an ohmmeter | SC 1: properties and principles of matter and energy | 3.1: Identify problems and define their scope and elements |
| D 4: Measure volts with a voltmeter or oscilloscope | SC 1: properties and principles of matter and energy | 3.1: Identify problems and define their scope and elements |
| D 5: Measure current with an ammeter | SC 1: properties and principles of matter and energy | 3.1: Identify problems and define their scope and elements |
| E 1: Clean and inspect battery clamps, cables, and connectors | HP 1: structures of, functions of, and relationships among human body systems<br>SC 1: properties and principles of matter and energy | 3.2: Develop and apply strategies based on ways others have prevented or solved problems<br>4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| E 2: Perform battery condition tests | SC 1: properties and principles of matter and energy | 3.1: Identify problems and define their scope and elements |
| E 3: Jump start a vehicle | HP 7: responses to emergency situations<br>SC 1: properties and principles of matter and energy | 3.2: Develop and apply strategies based on ways others have prevented or solved problems<br>4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| E 4: Charge and install a battery | SC 1: properties and principles of matter and energy | 3.2: Develop and apply strategies based on ways others have prevented or solved problems<br>4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| F 1: Diagnose starting system and determine needed repair | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspapers, technical manuals)<br>MA 1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations | 1.7: Evaluate the accuracy of information and the reliability of its sources<br>4.1: Explain reasoning and identify information used to support decisions<br>4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| F 2: Remove, clean, and inspect starter motor and components | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspapers, technical manuals) | 4.5: Develop, monitor and revise plans of action to meet deadlines and accomplish goals<br>4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| F 3: Repair or replace starter motor components | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspapers, technical manuals) | 3.2: Develop and apply strategies based on ways others have prevented or solved problems |
| G 1: Diagnose charging system and determine needed re | CA 3: reading and evaluating nonfiction works and material (such as biographies, newspa | 4.1: Explain reasoning and identify information used to support decisions |

| KEY: | | |
|---|---|---|

***Cross-Reference to Show-Me Standards***
***(mini report with words)***

| Duty Band and Task Statement | Knowledge (Content) | Performance (Goals) |
|---|---|---|
| Zh.1: Diagnose and repair heating system problems and determine needed repairs | SC.2: properties and principles of force and motion | 3.1: Identify problems and define their scope and elements |
| Zh.2: Inspect and replace heating system components | SC.2: properties and principles of force and motion | 3.1: Identify problems and define their scope and elements |
| Zi.1: Demonstrate an understanding of VICA, its structure and activities | SS.6: relationships of the individual and groups to institutions and cultural traditions | 4.3: Analyze the duties and responsibilities of individuals in societies |
| Zi.2: Demonstrate an understanding of one's personal values | SS.6: relationships of the individual and groups to institutions and cultural traditions | 4.4: Recognize and practice honesty and integrity in academic work and in the workplace |
| Zi.3: Perform tasks related to effective personal management skills | HP.2: principles and practices of physical and mental health (such as personal health habits, nutrition, stress management) | 4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| Zi.4: Demonstrate interpersonal skills | CA.6: participating in formal and informal presentations and discussions of issues and ideas | 2.3: Exchange information, questions and ideas while recognizing the perspectives of others |
| Zi.5: Demonstrate etiquette and courtesy | CA.6: participating in formal and informal presentations and discussions of issues and ideas | 2.3: Exchange information, questions and ideas while recognizing the perspectives of others |
| Zi.6: Demonstrate effectiveness in oral and written communication | CA.1: speaking and writing standard English (including grammar, usage, punctuation, spelling, capitalization) | 2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| Zi.7: Develop and maintain a code of professional ethics | SS.6: relationships of the individual and groups to institutions and cultural traditions | 4.4: Recognize and practice honesty and integrity in academic work and in the workplace |
| Zi.8: Maintain a good professional appearance | HP.2: principles and practices of physical and mental health (such as personal health habits, nutrition, stress management) | 4.7: Identify and apply practices that preserve and enhance the safety and health of self and others |
| Zi.9: Perform basic tasks related to securing and terminating employment | SS.4: economic concepts (including productivity and the market system) and principles (including the laws of supply and demand) | 4.8: Explore, prepare for and seek educational and job opportunities |
| Zi.10: Perform basic parliamentary procedure in a group meeting | SS.4: economic concepts (including productivity and the market system) and principles (including the laws of supply and demand) | 4.3: Analyze the duties and responsibilities of individuals in societies |

**KEY:** * = may use all "to do" statements # = same Frameworks as previous competency
98 = same Frameworks as previous competency 99 = "to know" statements may not be applicable

NOTE: Numbers in parentheses at the end of each competency apply to national skill standards by ASE. **(NOTE: These competencies are addressed on the Missouri VICA Curriculum Guide lessons.)

Competency Profile Date: 1989

| Duty Band and Task Statement | Knowledge (Content) | Performance (Goals) |
|---|---|---|
| | esentations (such as story-telling, debates, lectures, multi-media productions)<br>HP.4: principles of movement and physical fitness | 2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| J.11: Complete a basic set using various types of pin curls | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>HP.4: principles of movement and physical fitness | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| K.1: Place rollers on base, off base, and half base | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>MA.1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>MA.2: geometric and spatial sense involving measurement (including length, area, volume), trigonometry, and similarity and transformations of shapes | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| K.2: Place rollers for half bang | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>MA.1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>MA.2: geometric and spatial sense involving measurement (including length, area, volume), trigonometry, and similarity and transformations of shapes | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| K.3: Place rollers for hair to go back on top | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>MA.1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>MA.2: geometric and spatial sense involving measurement (including length, area, volume), trigonometry, and similarity and transformations of shapes | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| K.4: Place rollers on crown of head using triangle base | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>MA.1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>MA.2: geometric and spatial sense involving measurement (including length, area, volume), trigonometry, and similarity and transformations of shapes | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| K.5: Place vertical rollers in back to create design and wave pattern | CA.5: comprehending and evaluating the content and artistic aspects of oral and visual presentations (such as story-telling, debates, lectures, multi-media productions)<br>MA.1: addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations<br>MA.2: geometric and spatial sense involving measurement (including length, area, volume), trigonometry, and similarity and transformations of shapes | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>2.1: Plan and make written, oral and visual presentations for a variety of purposes and audiences |
| L.1: Apply basic comb out techniques | CA.4: writing formally (such as reports, narratives, essays) and informally (such as outlines, notes) | 1.5: Comprehend and evaluate written, visual and oral presentations and works<br>1.6: Discover and evaluate patterns and relationships in information, ideas and structures |
